### **DETAILED ACTION**

This communication is in response to amendment received on 07/27/06.

Claims 16 – 29 and 31 are presented for examination.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16 – 29 and 31, are rejected under 35 U.S.C. 102(b) as being anticipated by Jourdain et al. (6,541,964).

As to claims 16 – 29 and 31, Jourdain et al. (hereinafter Jourdain) discloses a method and apparatus for determining hydride content in a measurement object comprising subjecting the component (3) to a first eddy current producing signal (5); determining a first measurement variable of the component responsive to the first signal; subjecting the component (3) to a second eddy-current producing signal (5) having a different frequency than the first signal (col. 2, lines 32 - 45); determining a second measurement variable of the component responsive to the second signal, wherein the first and the second measurement variables each comprise conductivity or permeability of the component; determining a depth of the degraded region of the component according to a difference between the first and the second measurement variables (col. 2, lines 46 - 54) (Note fig. 1 and 2).

***Response to Arguments***

Applicant's arguments with respect to claims 16 – 29 and 31 have been considered but are moot in view of the new ground(s) of rejection.
